

More Control and Revenue From Your Payment Processing Partner

Vantage offers a white-label, full service, integrated payment solution designed for SaaS businesses with dedicated vendor relationship support to help manage the program, increase utilization, and scale operations.

Frictionless & Fast Onboarding

Vantage empowers SaaS businesses to set their own pricing plans and beat the competition, while retaining 100% of the spread.

ISVs benefit from a simple and paperless merchant onboarding process to register new accounts. And our system will automatically post back the merchant ID to the account.

Vendors maintain full control of the application process and we will host T&Cs to keep the process simple and painless.

Omni Channel Transaction Processing

The Vantage platform gives ISVs the ability to process transactions and refunds with next day settlement of funds.

Our ISV partners can process all major credit cards & receive ACH payments in a single hosted payment page (HPP). The HPP can be used to store (tokenize) sensitive credit card and ACH data for recurring billing and includes account updater services.

A card present SDK support mobile EMV chip readers.

Data On Every Transaction

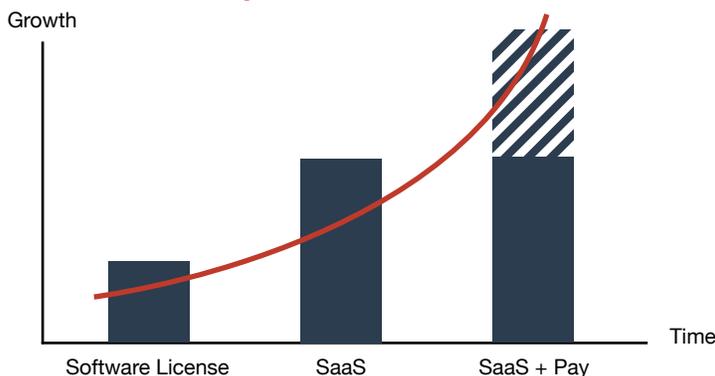

ISVs can use our API to develop custom reports and statements specific to their industry and client needs.

Data on every transaction is accessible for deposit details. ISV partners can add value with reconciliation and accounting reports that itemize next day flow of funds to merchant bank accounts.

ISVs can configure and automate notifications if ACH payments reject or cardholders initiate chargeback disputes.
