

Accept Credit Cards on the Course!

"I'll get this"

VeriFone's PCI PED-approved Vx670 is the smallest all-in-one wireless handheld payment device, built with the consumer in mind.

Using GPRS wireless communication for On the Spot transaction processing, the Vx670 operates a specially designed hospitality application and provides a highly configurable and flexible framework for payment at the point of service.

Call for a Vx670 On the Spot demo!

Enjoy the benefits of accepting credit & PIN debit cards on the course:

- Increase sales volume & transaction size over cash alone
- Improve course image & customer satisfaction
- Lower processing costs
 - Qualify at swiped card rates (+ incentive Interchange for tickets < \$15)
 - Accept PIN Debit transactions
- Reduced liability
 - Keeping cards can lead to skimming fraud & lost cards
 - Manually writing card number (incorrectly transcribed, fraud, lost drafts, etc.)
 - No approval codes / declined cards
 - No signature / chargebacks
- Virtually network multiple Verifone units together for a single batch report and settlement.
- Includes the IPCharge Recurring Billing Virtual Terminal to easily process member charges.
- Serves as a contingency back up to have available during system failures.

"A storm knocked out our power and internet. Because we also use the wireless Vx670, we were able to process transactions without missing a beat!"

Rob Van Leer, HMS Golf
